Hiring Manager
Simon Fraser University

Dear Hiring Manager,

I am writing to express my interest in the Business Analyst position with SFU IT Services. With over five years of experience supporting enterprise systems, application delivery, and business analysis in complex environments, I bring strong capabilities in requirements elicitation, process analysis, and Agile delivery that align closely with this role.

In my role as a Business Systems Analyst with the Idaho Department of Health and Welfare, I supported a large-scale enterprise system modernization initiative. I gathered and documented business requirements through BRDs and PRDs, developed user stories, and collaborated with cross-functional teams to deliver system enhancements. I also led testing efforts including UAT, regression, and end-to-end testing, ensuring alignment between system functionality and business requirements.

I have hands-on experience working in Agile Scrum environments using Azure DevOps, Jira, and Confluence, and I am comfortable facilitating collaboration between business stakeholders and technical teams. My experience using SQL, Power BI, and Visio has allowed me to analyze system data, model business processes, and support data-driven decision-making and process improvement initiatives.

Currently, as a Network Analyst, I support enterprise systems across multiple locations, ensuring system availability, resolving incidents using ITIL practices, and maintaining operational continuity. This experience has strengthened my ability to work in fast-paced environments while maintaining a strong focus on system reliability and user support.

I am particularly drawn to this opportunity at SFU because of its commitment to innovation and improving digital experiences for students, faculty, and staff. I am excited about the opportunity to contribute to meaningful projects that enhance system efficiency and support academic and operational excellence.

Thank you for your time and consideration. I look forward to the opportunity to contribute to SFU IT Services.

Sincerely,
Yash Ahlawat
