EXPERIENCE

BUSINESS OPERATIONS SPECIALIST (TEAM LEAD) | Amazon

01/2021 – 06/2023

- Spearheaded the global seller experience strategy for Amazon's PQ team, ensuring the authenticity and safety of **300+ million transactions monthly** and streamlining processes for **6+ million** 3P sellers across **25+ regions**.
- Developed advanced **risk detection** models that improved fraud detection accuracy by **35%**, reduced false positive escalations by **20%**, and saved **\$50 million** annually in operational costs.
- Streamlined enforcement **policies** across **16 regions**, increasing policy adherence by **25%** and cutting appeals resolution time by **33%** through automated workflows.
- Championed the integration of **ML-based** appeals triaging systems, reducing manual interventions by **40%** and boosting seller retention by **15%** year-over-year.
- Leveraged data analytics to optimize the appeals process, decreasing seller churn by **12%**, enhancing revenue retention by **\$75 million** annually, and improving operational efficiency by **27%**.
- Identified **inefficiencies** in the policy enforcement process AIT and MBO by analyzing transaction data and seller feedback, collaborating with global stakeholders and engineering teams to develop an **automated system** for policy updates and escalations, driving a **30% surge** in policy adoption and enhancing marketplace safety for **50 million+ buyers**.
- Led a team of **12 professionals** to resolve critical PR escalations by identifying fraudulent listings and seller accounts, reducing negative impacts on seller accounts by **30%**.
- Initiated corrective actions based on process reviews, achieving a **38% reduction** in defects while maintaining **0 defects** across **200,000 SKUs** for **90+ vendors**, supported by **10 dedicated investigator teams**.
- Mentored **60+ new hires** and program managers while implementing training initiatives that saved **1,320 work hours** annually; led a diverse team of **42 auditors** and **4 specialized investigation units**.

HEAD OF OPERATIONS AND SUPPLYCHAIN | Makemegarden.com (Startup)

05/2019 – 12/2020

- Led a team of **15 professionals** (comprising **5 marketing**, **5 product development**, and **5 operations experts**) to develop and execute a go-to-market strategy impacting over **300,000** customers.
- Achieved a **35% increase** in market share by growing active users from **200,000 to 270,000** and drove **50% revenue growth**, boosting annual revenue from **\$5 million to \$7.5 million** within 12 months.
- Collaborated with stakeholders to launch **3 new service offerings**, resulting in a **38% boost** in customer engagement, raising monthly active users from **150,000 to 207,000**.
- Delivered in-depth market research and competitive analysis to C-level executives, influencing pricing adjustments for over **500 products** and generating an incremental annual profit of **\$1 million**.
- **Negotiated** key vendor contracts that cut procurement costs by **15%**, saving approximately **\$300,000** annually, while improving supply chain lead times from **20 to 17 days**.
- Built and nurtured **8 key partnerships**, expanding the business network by over **50 contacts** and unlocking new growth opportunities that added an extra **\$500,000** in annual revenue.
- Streamlined procurement and inventory processes to reduce lead times by **25%** (from **16 hours to 12 hours**) and saved over **200 hours** monthly in operational overhead, equating to **\$15,000** in monthly labor cost savings.

- Developed **30+ marketing materials** that boosted client engagement by **15%** (from **800 to 920** interactions per campaign) and increased brand recognition by **10%** among a target audience of **50,000**.
- Launched a digital plan across **3 social media channels** that raised audience engagement by **12%**, adding over **500 daily interactions** and expanded market share from **4,000 to 4,400** customers.
- Oversaw **20 Google Ads campaigns** that achieved a **25% ROI**, increased monthly website traffic by **40%** (from **60,000 to 84,000** visits), and captured an additional **10% market share**.
- Produced **15 multimedia assets** that lifted user engagement by **20%** (increasing daily views from **1,000 to 1,200**) and improved conversion rates by **15%**, adding **50 new daily sign-ups**.
- Optimized ad spend, reducing campaign costs from **\$10,000 to \$8,500**, which drove a **15% increase in profitability** and added approximately **\$5,000 in extra monthly profit**.
- Crafted **Branding Strategy** with innovative design approaches that enhanced brand perception by **20%** (survey scores rising from **70 to 84**) and increased customer retention by **18%**, retaining an extra **150 customers per quarter**.
- Developed sales initiatives that boosted client acquisition by **25%** (from **120 to 150 clients**) and spurred an **18% revenue growth**, generating roughly **\$50,000 in additional quarterly revenue**.
- Executed plans that increased online visibility by **30%** (organic impressions growing from **100,000 to 130,000 monthly**) and grew lead generation by **40%**, resulting in **80 more leads each month**.
- Conducted surveys with over **500 customers** to refine messaging, leading to an **18% improvement in conversion rates** and **50 extra weekly conversions**.

Extra-Curricular Experience (Volunteering/Internships)

CONSULTANT- Business Transformation and Growth | Radiant freedom Digital marketing, Vancouver – BC 06/2024 – 01/2025

Optimized sales strategies and conducted A/B testing, increasing sales efficiency by 25% and lead conversion by 15%, resulting in an additional \$120,000 in revenue. Streamlined operations, reducing manual errors by 40% and cutting costs by \$5,000, while boosting online visibility by 35%, reaching 200,000 new customers. Applied Modern Portfolio Theory, generating a \$27,560 increase in investment returns and a 20% rise in client acquisition, bringing in 50 new clients. Managed a team of 10 consultants, achieving a 68% sales increase, contributing \$300,000 in sales growth through CRM tools like Salesforce and HubSpot.

PEER LEADER | University Canada West, Vancouver – BC

06/2024 – 09/2024

Led a team of 40+ peers, improving student success by 20%, resulting in 30 students improving their academic standing. Organized workshops and study sessions, increasing engagement by 30%, with 120 students participating in each event. Fostered a collaborative learning environment, boosting class performance by 15%, and contributed to a 10% increase in retention rates for the cohort.

VICE PRESIDENT | University Networking Club, Vancouver - BC

07/2023 – 09/2024

Organized 50+ networking events with industry professionals, attracting over 1400 attendees, and secured partnerships with 12 key industry players. Led a team to increase club membership by 25%, adding 250 new members, and facilitated professional development opportunities that expanded the club's reach to 500 students.

SUMA

+1 778-951-4731 | 0103su@gmail.com | www.linkedin.com/in/su7 | Burnaby, BC

PROFESSIONAL SUMMARY

PMP®-certified Project Manager with 9+ years of experience leading cross-functional delivery, financial oversight, and governance for high-value B2B projects. Proven track record managing multi-million-dollar portfolios (\$2M+) with full accountability for budgets, timelines, and risk mitigation to ensure seamless execution. Skilled in aligning complex client objectives with project deliverables through strategic planning, procurement, and operational excellence while leveraging data-driven insights to optimize workflows. An expert in PMI-aligned methodologies (Agile, Waterfall, and Hybrid), recognized for maintaining 100% audit readiness and achieving exceptional client retention rates through cost efficiencies and consistent on-time delivery.

CORE COMPETENCIES

- Portfolio & Multi-Project Management
- Budget Planning, Forecasting & Financial Control
- Issue & Escalation Management
- Stakeholder & Client Engagement
- Resource & Capacity Planning
- Project Lifecycle Management (Agile, Waterfall & Hybrid Project Delivery)
- Risk Management (Risk Registers, Mitigation Planning, RCA/CAPA)
- Contract Governance & SOW Development
- Executive Reporting & Governance Dashboards
- Audit & Compliance Management

Tools: MS Project, Advanced Excel, Jira, Power BI, MS Teams, SharePoint, Salesforce

PROFESSIONAL EXPERIENCE

Career Transition – Canada Relocation | Oct 2023 – Present Relocated to Canada; utilized transition period to complete PR process, earn PMP® certification (Jan 2026), and build local professional network.

Project Manager – Indegene Pvt Ltd | Jan 2020 – Sep 2023

Led end-to-end project delivery and governance oversight for global clients.

- Directed \$2M–\$2.5M annual portfolio with full accountability for budget planning, forecasting, financial performance, and schedule adherence
- Managed cross-functional matrix team of 30+ stakeholders, aligning deliverables, timelines, and resource capacity to meet client commitments
- Delivered projects using Waterfall and hybrid Agile methodologies, adapting delivery frameworks to client and program requirements
- Developed and maintained detailed project plans, cost estimates, work management frameworks, and milestone tracking structures
- Acted as primary client-facing governance lead, facilitating weekly/monthly status meetings and delivering executive-level performance dashboards
- Implemented structured risk mitigation strategies, including formal risk registers, contingency planning, issue escalation frameworks, and RCA/CAPA documentation
- Maintained 100% audit readiness and compliance through SOP governance and documentation controls
- Conducted financial variance analysis and resource utilization tracking to proactively manage profitability and delivery risks
- Contributed to contract renewals and commercial planning discussions supporting long-term program continuity
- Served as escalation point for operational and regulatory risks, ensuring timely mitigation and stakeholder communication
- Streamlined reporting processes and consolidated project management tools by introducing standardized PMI-aligned templates (change requests, resource utilization tracking), reducing administrative turnaround time by ~5%.
- Recognized with Quarterly Performance Awards (2x) for consistent delivery excellence

Project Coordinator – Accenture | Sep 2018 – Sep 2019

- Managed end-to-end delivery of large-scale network installation programs for a leading US enterprise client, overseeing full project lifecycle across timelines, budgets, and scope to ensure seamless execution.
- Procured equipment from third-party vendors, coordinating logistics and inventory to ensure on-time delivery to customer sites
- Developed comprehensive project plans and led internal and client kickoff meetings to align technical teams on goals, scope, and deliverables
- Monitored progress across project phases, proactively identifying and mitigating risks to maintain quality, schedule, and budget targets
- Maintained detailed progress reports, order trackers, and open action logs; facilitated weekly status calls to keep stakeholders aligned
- Conducted project closeout reviews, gathered client feedback, and submitted final reports to Verizon management for post-project evaluation

Customer Solutions Specialist – Hewlett Packard Enterprise (HPE) | Jan 2014 – Aug 2018

- Ensured 99% SLA compliance while managing a high-volume enterprise support queue, resolving complex escalations and maintaining documentation standards
- Handled first-level escalations for L0 service desk, ensuring swift resolution and stakeholder communication
- Generated in-depth dashboards and data analysis reports on SLA adherence, open cases, and incident logs, providing senior management with actionable insights for team performance and decision-making
- Conducted refresher training and offline audits, enhancing team knowledge and compliance
- Awarded "Best Newcomer" for exceeding performance benchmarks

CERTIFICATIONS

Project Management Professional (PMP®) | Power BI & Advanced Excel | AI Applications for Project Managers

EDUCATION

- Post Graduate Diploma in Management | Alliance Business School | 2016 - 2017
- Bachelor of Commerce | Bishop Cotton Academy of Professional Management | 2010 - 2013

BUSINESS ANALYST

User-centric Business Analyst with over 5 years of experience building and implementing software solutions that optimize business processes within IT consulting, Telecom, Banking, E-commerce, and Retail industries. Experienced at transforming vague Project scopes into detailed specifications by driving alignment on key business requirements with stakeholders. Passionate about leveraging data & lean methodology to make decisions that improve company KPIs.

SKILLS

- | | | | |
|---|---|--|--|
| • Business Requirements (BRD, JIRA, User Stories) | • Data Visualization & report (Excel, Power BI) | • User Acceptance Testing (Test Cases & Scripts) | • Change Management (Demos, User Guides) |
| • Business Case Documents | • Process Mapping (Visio) | • Market Research (Swot) | • Release Management |
| • Gap & Root Cause Analysis | • Wireframing (Balsamiq) | • Project Management | • Release Notes Documents |
| • Use Case Analysis | • Backlog Refinement | • Scrum, Kanban, SDLC, Agile, Waterfall | • Stakeholder Alignment |

WORK EXPERIENCE

BUSINESS ANALYST | Walmart Canada

Mar 2024-Present

- Analyzed key pain points causing late delivery by surveying 10 Walmart stores, resulting in the business case documentation and introducing 2 key features to improve order management.
- Collaborated with 2 UI/UX designers by documenting low-fidelity mocks using Balsamiq, resulting in the building of a friendly UX that significantly improved user adoption.
- Worked closely with the development team to translate business needs into user stories, using Jira, ensuring development met customer needs, leading to quicker feature releases.
- Supported Agile ceremonies such as sprint planning and backlog grooming, aligning development efforts with evolving business goals.
- Trained Omni associates using hands-on training sessions and instructional materials, resulting in increased system adoption shortly after launch.
- **Key Achievements:**
- Drove key system enhancements by analyzing pain points from multiple store locations and developing a business case that led to the introduction of high-impact features, improving order fulfillment efficiency.
- Led onboarding efforts by creating training materials and conducting hands-on sessions for team members, resulting in stronger system adoption and a noticeable drop in post-launch support needs.

BUSINESS ANALYST | ESAMI NIG.LTD (IT CONSULT.)

Jan 2021-Dec 2023

- Conducted interviews to gather initial business requirements, ensuring alignment with strategic goals, resulting in clearer and more actionable requirements.
- Collaborated with UX/UI designers using Visio to create user personas and low-fi mock-ups, ensuring design alignment and securing full design approval within a short timeframe, helping to speed up the project timeline.
- Coordinated UAT sessions with users, ensuring most user scenarios were covered and issues were resolved before launch. Resulted in noticeable improvements in user satisfaction.

- Monitored post-launch performance, capturing user feedback to refine and implement 5+ system enhancements within 3 months, leading to stronger user engagement and system usability.

Key Achievements:

- Improved requirement clarity by leading stakeholder interviews and workshops across multiple locations, ensuring the digital platform aligned with strategic goals and user needs.
- Boosted user engagement post-launch by gathering feedback, identifying key experience gaps, and implementing platform enhancements to better support transactions and onboarding.

JUNIOR BUSINESS ANALYST | ESAMI NIG.LTD (IT CONSULT.)

Jan 2020-Dec 2021

- Assisted Senior Business Analysts create the Business Requirements Document in MS Word, working with stakeholders to align system needs and improving billing accuracy.
- Worked with internal teams to support the creation of reporting tools that helped identify billing issues early and improved customer experience.
- Collaborated with QA teams to define test cases and support UAT, ensuring the system met functionality and performance standards, resulting in high user satisfaction.
- Assisted with change management by preparing training materials and conducting sessions for internal teams, which helped speed up system adoption post-launch.
- **Key Achievements:**
- Supported senior analysts in capturing and documenting stakeholder requirements, contributing to a Business Requirements Document that led to improved billing accuracy.
- Assisted with user training and prepared onboarding materials, which led to a smoother transition and quicker system adoption for internal teams.

EDUCATION AND PROFESSIONAL CERTIFICATIONS

- Post Graduate Diploma | Business Management | Cape Breton University, Nova Scotia, Canada
- Bachelor of Science | International Relations & Diplomacy | Bowen University | Osun State, Nigeria
- Certified Scrum Master | SCRUM STUDY
- Business Analyst Certification | IIBA

VOLUNTEER ACTIVITY

- **United Nations (SDGS Volunteer) |** Promoted SDG awareness and participated in initiatives like tree planting (SDG 13) and supporting education (SDG 4)

AYOMIDE ABASS

ayoabass777@gmail.com | Vancouver, BC | [linkedin.com/in/ayomideabass](https://www.linkedin.com/in/ayomideabass)

May 13, 2026

Hiring Manager
IT Services
Simon Fraser University
Burnaby, BC

Dear Hiring Manager,

I am writing to apply for the Business Analyst position with SFU IT Services. With a Bachelor of Science in Computer Science, a Master of Business Administration, and over three years of hands-on experience analysing business needs, documenting processes, and delivering functional specifications in a complex, multi-site environment, I am confident I can contribute meaningfully to SFU's mission of advancing innovation through effective use of data and technology.

In my current role at Community Builders Group, a Vancouver-based non-profit operating 16 supportive housing sites with over 1,000 beds, I lead all phases of business analysis for medium to large software solutions that serve cross-functional stakeholders. I have gathered and documented requirements for a centralised tenant management system consolidating data from 15 rooming houses, facilitated process re-engineering workshops using BPMN to standardise intake and service delivery workflows, and coordinated UAT across frontline staff to ensure quality assurance before deployment. This work has directly improved referral completion rates by 25% and reduced monthly reporting time by 60% through Power BI dashboards I designed and built.

My technical background in computer science gives me the fluency to work closely with development teams on functional specifications, software integration, and change management, while my MBA provides the strategic perspective to align technology solutions with organisational goals. I am experienced with requirements elicitation techniques including stakeholder interviews, workshops, and document analysis, and I use tools such as Jira, Confluence, Visio, and SQL daily. I am particularly drawn to SFU's focus on improving the digital experience for students, faculty, and staff — a mission that resonates with my passion for using technology to serve communities.

I would welcome the opportunity to discuss how my experience in business process improvement, requirements analysis, and cross-functional facilitation can support SFU IT Services. Thank you for considering my application.

Sincerely,

Ayomide Abass

AYOMIDE ABASS

ayoabass777@gmail.com | Vancouver, BC | linkedin.com/in/ayomideabass

PROFESSIONAL SUMMARY

Business Analyst with 3+ years of experience in requirements elicitation, business process re-engineering, and functional specification development within a large, complex, multi-site organisation. Combines a Computer Science degree with an MBA to bridge technical and business stakeholders. Proficient in BPMN, change management, and quality assurance best practices. Experienced in all phases of analysis for medium to large software solutions involving cross-functional clients.

PROFESSIONAL EXPERIENCE

Business Analyst

Community Builders Group | Vancouver, BC | Jan 2025 – Present

- Lead all phases of business analysis for medium to large software solutions, gathering requirements from cross-functional clients including property managers, tenant support workers, IT, and senior leadership
- Documented functional specifications for a centralised tenant management system integrating data from 15 Downtown Eastside sites and 900+ residents, coordinating with developers on implementation and integration
- Facilitated business process re-engineering workshops using BPMN to standardise intake, referral, and service delivery workflows across 16 sites, improving referral completion rates by 25%
- Built Power BI dashboards tracking occupancy, tenant turnover, and support service KPIs across 1,000+ beds, reducing monthly reporting time by 60%
- Led change management for the Gastown Hotel and The Luugat site onboarding projects, defining intake workflows and training plans for 200+ new beds
- Conducted gap analysis and produced a phased operational readiness plan for the East Keith Road 60-unit complex care development, adopted by senior leadership

Junior Business Analyst

Community Builders Group | Vancouver, BC | Jun 2023 – Dec 2024

- Elicited and documented business requirements for 5 supportive housing sites using stakeholder interviews, workshops, and document analysis techniques
- Mapped As-Is and To-Be processes using BPMN notation for tenant intake, incident reporting, and maintenance request workflows, reducing average intake processing time from 5 days to 2 days
- Wrote user stories and acceptance criteria in Jira for an enterprise-level case management application, maintaining a 95% sprint completion rate
- Coordinated quality assurance and UAT with frontline staff across multiple sites, cutting post-launch defects by 40%
- Compiled quarterly outcome reports for BC Housing and municipal funders, analysing occupancy data, service hours, and housing stability metrics for 1,000+ tenants
- Mentored two junior team members on requirements documentation standards and Jira workflow management

CORE SKILLS

Analysis:	Requirements Elicitation, Business Process Re-engineering, Gap Analysis, Change Management, QA
Tools:	Jira, Confluence, Power BI, SQL, Excel (Advanced), Visio, Lucidchart, SharePoint
Methods:	BPMN, Agile/Scrum, UML, User Story Mapping, MoSCoW Prioritisation, UAT Coordination
Strengths:	Stakeholder Facilitation, Leadership & Mentorship, Analytical Reasoning, Cross-functional Collaboration

TECHNICAL PROJECTS

SaaS Intel — Competitive Intelligence Platform

- Conducted competitor analysis across 5 enterprise CI tools, documenting a market gap and producing requirements documentation, executive summary, and investor deck
- Defined feature roadmap, pricing model, and automated reporting workflows for MVP validation

Pulse — Session Analytics Dashboard

- Designed functional specifications for a streaming analytics pipeline tracking user sessions, funnels, and engagement metrics, with dbt data models powering a Power BI dashboard

EDUCATION

Master of Business Administration (MBA)
University Canada West | Vancouver, BC | 2024

Bachelor of Science in Computer Science
University of Ghana | Accra, Ghana | 2022

SARA ABAYAZEED

(519) 781-3834 | saraabayazeed@gmail.com

SUMMARY OF QUALIFICATIONS

- Self-Starter who is excellent at building and maintaining relationships
- Ability to work well under pressure and handle multiple tasks in a fast-paced environment with minimal supervision
- Strong business acumen; ability to read and interpret complex market reports and analytical tools
- Responsible and well organized in ensuring tasks are completed efficiently and in a timely manner
- Proficient computer skills, including Google Suite and MS Office in Excel, Word, and PowerPoint
- Proficient in PowerBI, Tableau, and GA4

WORK EXPERIENCE

Maglin Site Furniture

Marketing Analyst

Oct. 2022 – Present

- Conduct competitor research and analyse the findings to make recommendations on marketing strategy
- Measure campaign performance and analyse the findings to make recommendations for future campaigns, product development, and business development decisions
- Work with the Sales, and Product Development departments to put together a full picture of customers' needs, and industry trends
- Track and analyse digital customer behaviour to better understand website usage and make recommendations on improving the sales cycle, and the web tools
- Automate reporting and develop performance dashboards for the Marketing and Sales departments
- Gather large volumes of data from various sources and analyse for key findings
- Present key findings and insights to stakeholders on a monthly and quarterly basis

TIGER Drylac Canada Inc.

Digital Marketing Coordinator

Jan. 2022 – Oct. 2022

- Developed and execute website tools and content
- Assisted in the development, execution and maintenance of an E-commerce web shop
- Managed blogs and integrated them into digital marketing programs
- Managed email marketing campaigns
- Managed the Commercial Messaging Service program
- Contributed to regular analytics reports that captured Social Media Key Performance Indicators and digital advertising results, and E-commerce web shop performance

Total Image Group

Process and Marketing Manager

Jun. 2017 – Jun. 2021

- Successfully implemented a new software operating system which helped save senior management 10 hours of paperwork per week
- Created an efficient and accurate system to track lost prevention and in store usage of products
- Analyzed data to determine campaign efficacy, which showed a consistent increase in Instagram and Facebook engagement by 56% over the past 6 months
- Initiated market research studies and used findings to develop and implement marketing strategies
- Developed and organized workshops and events to introduce new products and services

EDUCATION

University of Guelph

Bachelor of Commerce – Marketing Management

2011 – 2015

Shivani A
Sr. Business Analyst

Email: Shivaniabbu02@gmail.com

Contact No: 2898597160

Summary:

Senior Business Analyst with 8+ years of experience delivering data-driven solutions across investment analytics, product strategy, and operational optimization in fintech and e-commerce domains. Proficient in Power BI, SQL, Alteryx, Excel, JIRA, Confluence, and statistical tools (Python, SAS), with deep expertise in data modeling, portfolio analysis, and requirement documentation (BRD/FRD). Adept at translating complex datasets into actionable insights, automating reporting pipelines, and driving informed decision-making through robust dashboards and analytical models. Recognized for enhancing fund performance, streamlining global processes, and fostering cross-functional collaboration in Agile environments.

Technical Skills:

- **Business Analysis & Documentation:** BRD, FRD, User Stories, Epics, Acceptance Criteria, Agile Methodology, Scrum Framework, Requirement Traceability Matrix (RTM), Stakeholder Communication & Strategic Presentation, Confluence (for centralized documentation), JIRA (for backlog, ticketing, Sprint planning).
- **Data Analytics & BI Tools:** Power BI, Tableau Amazon Quick Sight, Excel, SAS, ETL, Alteryx, SQL, Python.
- **Data Integration & Formats:** XML & JSON, API payload construction and validation, Data mapping and system interface definition.
- **Automation & Scripting:** VBA for Excel automation, Python, HTML.
- **Project Management & Tools:** Lean Six Sigma, Sprint planning and tracking in JIRA, On-demand reporting and ad-hoc analysis.

Employment History:

Sr. Business Analyst| Questrade Financial - North York, ON| June 2023 - Till Date

- Analysed investment, portfolio, and market data using Alteryx and advanced data modelling techniques to generate insights that improved product strategy, asset allocation, and risk assessment, directly contributing to enhanced fund performance and alignment with evolving market conditions and investor expectations.
- Developed and maintained dynamic Power BI dashboards integrating fund performance, benchmark comparisons, and client behavior metrics, enabling senior investment leaders to monitor portfolio health, detect trends, and make proactive, data-driven decisions for strategic planning and product enhancements.
- Created detailed peer benchmarking and competitor analysis using Excel Sheets, market data, and client feedback, identifying positioning gaps and proposing strategic changes that improved differentiation, increased investor engagement, and supported stronger market share within core investment categories.
- Collaborated with engineering teams to ensure data accuracy by validating pipelines and performing root cause analysis using SAS and SQL, maintaining high data integrity standards and supporting critical reporting used in investment strategy reviews and performance evaluations.
- Conducted portfolio simulations and investment hypothesis testing using data modeling frameworks, producing targeted risk-return analysis and supporting tactical recommendations that shaped asset allocation strategies and contributed to better fund performance over short- and long-term horizons.
- Managed ad hoc investment research and analysis tasks through JIRA, ensuring transparency, task ownership, and delivery of on-demand insights aligned with product team priorities and leadership queries related to product utilization, investor trends, and market shifts.
- Maintained structured business and technical documentation in Confluence, detailing data sources, logic, KPI definitions, and report templates to ensure analytic consistency, streamline cross-functional collaboration, and support rapid onboarding and handoffs across investment and product teams.
- Delivered high-impact presentations by translating complex quantitative results into strategic insights; supported leadership decisions using SQL and Excel, conducting rapid ad-hoc analyses on fund flows, asset allocations, and investor behaviours to validate investment strategy and product direction.

Associate Business Analyst - Amazon, India |Feb 2019 – April 2023

- Conducted requirement gathering, documented BRD/FRD via Jira and Confluence, modeled ETLM pipelines, and developed dashboards using Excel (VBA, pivot tables, Power Pivot), Tableau, and SQL to automate reporting and streamline operational analytics across cross-functional, global expansion projects.
- Delivered statistical analyses, including regressions and t-tests using Python and R, to drive data-driven decisions. Designed forecasting models, performance benchmarks, and KPIs while aligning business recommendations with strategic initiatives and presenting findings with clarity to stakeholders and leadership.
- Developed and optimized automated data pipelines integrating XML, JSON, and SQL datasets. Built QuickSight and Power BI dashboards for metrics tracking and customer experience improvement. Applied macros and advanced Excel to enhance reporting accuracy, speed, and monitoring capabilities.
- Collaborated with project managers and cross-functional teams to implement Lean Six Sigma initiatives that improved process efficiency, enabled work authorization process optimization, and delivered program outcomes aligned with enterprise-wide tactical planning and stakeholder engagement.
- Developed data management systems and conducted query optimization to improve scalability and minimize processing latency. Created secure, scalable dashboards and report automation pipelines that supported program ownership and performance benchmarking across diverse data systems.
- Applied HTML and Java to support automation workflows and dashboard UI customization. Built and maintained automated KPIs and metrics dashboards integrated into business intelligence ecosystems. Enhanced data integrity while ensuring discretion and security of sensitive datasets.
- Facilitated strategic communication, stakeholder influence, and consensus-building using strong presentation skills. Actively supported performance tracking, customer service improvements, and report automation while demonstrating initiative, curiosity, adaptability, time management, and continuous learning in high-volume, fast-paced environments.
- Demonstrated ownership mindset and collaboration in delivering high-impact automation solutions. Managed complex analytical projects involving business analysis, data modeling, and process optimization. Provided strategic insight using BI tools and statistical forecasting to support decision-makers in operational and enterprise-level goals.

Associate Consultant(Business Analyst) – Capgemini, India| Aug 2016 - Jan 2019

- Collaborated with business teams to analyze requirements and developed comprehensive BRD documents that captured stakeholder needs, enabling alignment with project goals and serving as a foundational reference for developers, testers, and product managers throughout the agile development lifecycle.
- Created detailed FRD specifications by translating business processes into functional system requirements, using workflow diagrams and process models to guide technical teams in building scalable, user-centered features that aligned with business objectives and architectural standards.
- Maintained structured documentation for all analysis deliverables, process changes, and solution designs, ensuring traceability and version control while improving knowledge transfer across teams during project handoffs, audits, and solution implementation cycles.
- Tracked user stories, epics, and sprint progress using JIRA, enabling visibility into project timelines and ensuring backlog refinement, acceptance criteria, and workflow statuses were consistently updated in alignment with agile best practices and stakeholder expectations.
- Utilized Confluence to maintain centralized business analysis artifacts, project notes, and requirement traceability matrices, promoting cross-functional collaboration and keeping teams aligned through shared documentation, templates, and process wikis.
- Defined system interface needs and data mapping by capturing examples using XML schemas during integration discussions, enabling accurate communication with development teams and ensuring proper formatting and structure of transmitted data between platforms.
- Collaborated with developers and QA teams to structure payload data using JSON, validating key-value pair formatting and content expectations during API testing and ensuring proper support for downstream application logic and user functionality.
- Logged and managed detailed JIRA tickets for new feature requests, enhancements, and bug tracking, ensuring traceability of business requirements from inception through deployment and providing real-time visibility into development status and issue resolution.

Education:

- Bachelor of Technology in Computer Science from JNTUH, India – 2016.

Zachary Abel

Work Experience

IT Specialist

Tolko Industries

05/2019 – 08/2020, 06/2022-06/2023

Achievements

- Provided support for 3 separate sites
- Scheduled and conducted downtime maintenance
- Designed a backup system using PowerShell
- Managed networks, servers, and thin clients
- Provided disaster recovery support when a weather event took out the site
- Improved team relations between IT and other departments
- Problem-solved issues with contractor software
- Debugged process control code

IT Field Technologist 2

School district 27

06/2024 – 01/2025, 06/2025 – 08

Achievements

- Installed networking hardware at 18+ sites
- Implemented parts of a district wide wireless project
- Provided network troubleshooting
- Coordinated cutovers and mitigated resulting issues

Education

BSC: Computer Science

Thompson Rivers University

2018-2019, 2020-2022, 2023-2025

Technical Skills

Tools

NetBeans, Windows PowerShell ISE, Oracle SQL Developer, Tesseract ORC, Android Studio, SCCM, vSphere, MongoDB, PowerBI

Recent Libraries

Node.js, AngularJS, jQuery, Bootstrap4, Pandas

Languages

Python, SQL, Java, HTML, JavaScript, PowerShell, C, Arduino, R, Kotlin, PHP

Research and Projects

- Bioinformatic Pipeline for AMR in cattle
- Convolutional neural network classification of skin cancer using Keras and TensorFlow
- Location-locked file storage, android app, using firebase and Java
- HazMat disposal bot for disaster scenarios
- Parking information android app, using firebase and Kotlin
- Image hosting site, using PHP as a single-page application
- Semantic Data Lake Frameworks: a study on the integration of semantic modeling
- Literature review of reforestation methods

Volunteering

Treasurer

TRU Kappa Sigma

09/2018 – 05/2019

Achievements

- Organized participation of members for the Kamloops shoreline cleanup
- Organized a food drive called Trick or Eat
- Maintained finances of the organization

Deven Adajania

Vancouver, BC | 250-572-7737 | dadajania@gmail.com | <https://www.linkedin.com/in/deven-adajania/>

Strategic initiatives and partnership professional with experience advancing global engagement, building cross-cultural relationships, and managing multi-stakeholder projects. Recognized for driving institutional priorities through collaboration and international recruitment support, while bringing strong technical expertise in data analytics, dashboard development, and digital tools to inform strategy and decision-making.

EDUCATION

BEEDIE SCHOOL OF BUSINESS, SIMON FRASER UNIVERSITY

Vancouver, BC

Master of Business Administration (MBA) - Cumulative GPA: 3.6/ 4.0

Active Member: Senate Graduate Studies Committee (SGSC), Dean's List 2024

THOMPSON RIVERS UNIVERSITY

Kamloops, BC

Bachelor of Computing Science

2023

Recipient of Co-op Distinction Award & Dean's List (2021-2022); Hackathon 1st Finalist (2021)

WORK EXPERIENCE

Project Manager

Jan 2024 – Sep 2024

AYD Internet Marketing

Vancouver, BC

- Coordinated a 20-person team across development, advertising, copywriting, content, and analytics departments.
- Led a campaign relaunch project and delivered 2 weeks early, and boosted client engagement by 35%.
- Introduced structured workflows and weekly check-ins, reducing missed deadlines and improving team alignment
- Built reporting workflows and dashboards that provided real-time visibility into performance and risks, improving project efficiency.
- Collaborated with client stakeholders and external vendors to align campaign objectives with organizational priorities, strengthening partnerships and ensuring long-term impact.
- Trained junior team members on project workflows and reporting tools, building capacity and ensuring consistency across future initiatives.

Business Analyst

May 2021 – Sep 2023

Thompson Rivers University

Kamloops, BC

- Developed Tableau dashboards and optimized 100+ datasets, improving decision-making accuracy by 80%. Partnered with multiple departments to support enrollment and international recruitment initiatives
- Built dashboards and reports that enabled faster, data-driven insights for leadership. Used SQL to extract data from institutional databases, improving data retrieval speed and accuracy.
- Transformed complex data into actionable insights for funding opportunities, accelerating cross-department decision-making by 40%
- Collaborated with international programs office to analyze student mobility trends, providing data that informed partnership strategies and global engagement priorities.

Software Developer

Sep 2020 – Feb 2021

Ugo Local Corporation (Contract)

Kamloops, BC

- Worked with a small dev team to build and launch a React Native food delivery app, gaining 10,000+ users at launch.
- Fixed bugs and improved app stability during beta testing, reducing crash reports by 90%.
- Contributed to new feature development, including user login, order tracking, and in-app notifications to enhance user experience.

PROJECT EXPERIENCE

Marketing Business Solution Project - OBD Experts

- Co-created a strategic growth report for an automotive diagnostics client with a 4-person consulting team.
- Conducted benchmarking and market research on 10+ international competitors, uncovering two new customer segments with \$1.5M revenue potential.

Computer Science Capstone - SilverServers Inc.

- Developed custom ETL scripts in Python to extract data from Google Analytics 4 and transform and load data into multiple SQL database tables in the destination data warehouse. Overhauled the company's legacy code, which added 84% to system capacity and cut \$3500 from monthly operating costs.

VOLUNTEERING AND EXTRACURRICULAR ACTIVITIES

Graduate Student Senator, SFU Senate:

Advocated for graduate students in academic policy discussions, contributing to SFU's globally engaged mission

SFU Beedie MBA Ambassador:

Supported prospective international students and built connections to strengthen SFU

Judge SFU Beedie BUS Case Challenge:

Assessed case presentations and provided strategic feedback.

STEM Mentor, SD73 Robotics Tournament

Mentored students in designing and programming robotics with Arduino and Raspberry Pi.

MBA Games – Served as Basketball Team Captain and Case Competition Coordinator, leading teams in both athletic and academic competitions.

ADDITIONAL

Technical Skills: Python, SQL, Excel, Power BI, Git, Java, React Native, WordPress, Wix, HTML/ CSS, Tableau, Star UML, Android Studio, Jira **Certifications & Training:** Google Data Analytics Certificate **Soft Skills:** Stakeholder Engagement, International Partnerships, Strategic Planning, Cross-Cultural Communication, Project Management

ADEJOKE ADEYEMI

adeyemi.adejoke.adedoyin@gmail.com • 778 680 8310 • British Columbia, Canada

PROFESSIONAL SUMMARY

Experienced Senior Business Analyst with over nine years of expertise in business analysis, process improvement, and project delivery across IT and business transformation projects. Skilled at gathering and documenting complex requirements, leading cross-functional teams, and driving process optimization initiatives that align with organizational goals. Adept at mentoring junior analysts, facilitating workshops, and translating business needs into actionable solutions. Proven track record of delivering measurable results through stakeholder collaboration and continuous process improvement.

CORE COMPETENCIES

- Business & Functional Requirements Elicitation
- Process Reengineering & Optimization
- Stakeholder & Client Relationship Management
- Cross-Functional Team Collaboration
- Requirements Documentation & Analysis
- Project Planning & Execution
- User Acceptance Testing (UAT) Oversight
- Mentorship & Team Leadership
- Business Process Mapping & Gap Analysis
- Change Management & Scope Control
- Agile, Scrum & Waterfall Methodologies
- Performance Measurement & Reporting

TECHNICAL SKILLS

- Requirements Tools: Jira, HP QC, MS Visio, Lucidchart, Google Docs
- ERP Systems: SAP HCM
- Project Management: Work Breakdown Structures (WBS), Project Charters, Kanban/Scrum Board
- Testing & QA: QA Testing, UAT, Test Strategies
- Process Modeling: Business Process Decomposition, Process Flowcharts, Gap Analysis
- Collaboration Tools: Gmail, SharePoint, Google Docs

PROFESSIONAL EXPERIENCE

Senior Business Systems Analyst | Community Action Initiative

Vancouver BC Canada | 2024-02 - Present

- Directed the collection, analysis, and documentation of complex business requirements from senior stakeholders, ensuring 100% alignment with project objectives.
- Led project planning, execution, and monitoring activities, achieving 95% adherence to timelines and minimizing scope changes through effective use of project management tools.
- Developed and obtained sign-off on business assessments, project charters, and functional design documents to support new initiatives.
- Facilitated workshops, focus groups, and JAD sessions to elicit and validate requirements, resulting in actionable business cases and process flows.

- Created and maintained business process decomposition and process flow documentation for process design and analysis, improving clarity for cross-functional teams.
- Oversaw User Acceptance Testing (UAT), coordinated defect resolution, and ensured delivery of high-quality outputs that met business needs.
- Mentored junior analysts and supported project managers, promoting best practices in business analysis and project execution.
- Collaborated with IT, operations, and executive management to guarantee successful project outcomes and stakeholder satisfaction.
- Tracked and reported on the performance of implemented solutions, recommending enhancements based on data-driven insights.

Selected Project Highlights:

- Reduced project delivery time by 20% through improved requirements gathering and stakeholder engagement.
- Achieved 100% requirements sign-off on all major initiatives by facilitating effective workshops and validation sessions.
- Improved process documentation quality, resulting in a 30% reduction in clarification requests from development teams.

Senior Business Analyst | Pacific Community Resources Society

Vancouver BC Canada | 2022-12 - 2024-01

- Conducted comprehensive business analysis, gathering and documenting requirements for enterprise projects.
- Led analysis of business process workflows and proposed optimization solutions, balancing benefits, risks, and costs.
- Crafted detailed business requirements documents (BRD) and functional design documents (FDD) to guide solution development.
- Facilitated workshops, requirements kickoffs, and validation sessions with stakeholders, ensuring accurate requirements elicitation and sign-off.
- Coordinated project approval processes and maintained alignment with governance structures, improving project completion rates by 80%.
- Analyzed and summarized data for models, tracking performance against business objectives and forecasts.
- Organized and led training sessions, walkthroughs, and developer briefings to ensure project understanding and adoption.
- Liaised with cross-functional teams, including clients, business, and project management, to ensure successful project delivery.
- Developed data mapping and conversion documentation, supporting seamless data migration and system integration.

Selected Project Highlights:

- Increased project completion rates by 80% through improved process reviews and milestone tracking.
- Streamlined requirements validation, reducing sign-off cycle time by 25%.
- Enhanced stakeholder engagement, resulting in higher satisfaction scores on post-project surveys.

Business Analyst | First Registrars & Investors Services Limited

Lagos Nigeria | 2019-01 - 2022-12

- Analyzed core business processes, identified gaps between current and future states, and communicated improvement opportunities to stakeholders.
- Conducted regular project reviews to assess performance against key milestones, increasing project completion rates by 15%.
- Developed project management standards, tools, and templates to align with industry best practices.

- Mentored junior project staff on project management tools and techniques, raising team efficiency and skill levels.
- Coordinated with cross-functional teams and clients to address project risks and ensure successful project delivery.
- Modeled processes and workflows using Microsoft Visio, providing visual clarity for stakeholders.
- Collaborated with UI/UX designers to develop user-friendly designs tailored to client needs.
- Supported development and QA teams to ensure requirements were understood and met during implementation.
- Facilitated sprint reviews and obtained feedback from business stakeholders to drive continuous improvement.

Selected Project Highlights:

- Improved project completion rates by 15% through enhanced milestone tracking and risk management.
- Developed standardized project management templates, reducing planning time by 20%.
- Increased team efficiency by mentoring junior staff and introducing new project management tools.

Business Process Analyst | First Registrars & Investors Services Limited

Lagos Nigeria | 2014-01 - 2018-12

- Reviewed and analyzed existing business processes and workflows to identify opportunities for improvement, including automation and streamlining of manual tasks.
- Conducted gap analysis and made recommendations to executive management for process enhancements.
- Supported project managers to ensure projects remained within timelines and scope, minimizing risk of delays.
- Coordinated and drove change across cross-functional teams, fostering collaboration and buy-in.
- Worked with stakeholders to assess the impact of ERP solution implementations and calculated ROI for proposed changes.
- Facilitated sprint planning, daily stand-ups, and retrospective meetings to support Agile delivery.
- Developed strategies to improve the service development life cycle and governance processes.
- Maintained strong working relationships with business contacts, IT developers, and vendors to support project success.
- Served as liaison between business and technical teams, ensuring clear communication and understanding of requirements.

Selected Project Highlights:

- Automated manual processes, reducing processing time by 40% and improving operational efficiency.
- Led gap analysis initiatives, resulting in executive approval for three major process improvement projects.
- Supported successful ERP implementation, achieving targeted ROI and improved user adoption rates.

EDUCATION

Business Administration (MBA)

University Canada West | Vancouver, British Columbia

SOFT SKILLS & COMPETENCIES

- **Communication** – Clear and effective verbal and written communication with stakeholders and team members
- **Collaboration** – Works well with cross-functional teams to achieve project objectives
- **Problem-Solving** – Strong analytical skills to identify root causes and propose practical solutions
- **Leadership** – Experience mentoring junior analysts and supporting project managers
- **Adaptability** – Able to adjust quickly to changing project requirements and environments

- **Attention to Detail** – Ensures accuracy in documentation and process mapping
- **Time Management** – Prioritizes tasks to meet tight deadlines and project milestones
- **Facilitation** – Skilled at leading workshops, meetings, and requirements sessions
- **Customer Service Orientation** – Focused on delivering value to clients and end-users
- **Continuous Improvement** – Always seeking ways to enhance processes and outcomes
- **Decision-Making** – Makes informed choices based on data and stakeholder input
- **Conflict Resolution** – Handles disagreements constructively to maintain project momentum
- **Initiative** – Proactively identifies opportunities for improvement and takes action
- **Organizational Skills** – Maintains comprehensive documentation and project records
- **Stakeholder Engagement** – Builds strong relationships with business users and executives
- **Training & Development** – Provides guidance and training to team members

Kingsley Adequaye
7719 155a Street
Surrey, BC
Canada

Dear Hiring Manager,
Simon Fraser University

Application for Project Coordinator Position

I am excited to apply for the Business Analyst position. With professional experience spanning construction operations and business analysis, I bring a structured, analytical approach to requirements gathering, process improvement, and stakeholder collaboration—capabilities essential for delivering effective business and technology solutions.

In my role as an Ironworker (Reinforcing) with A&H Steel, I regularly work with structural drawings, technical specifications, and multidisciplinary teams on major projects including the New St. Paul Hospital, Royal Columbia Hospital Expansion, Woodfibre LNG, and the PNE Amphitheatre. This experience has strengthened my ability to interpret complex documentation, identify discrepancies, and ensure alignment between design intent and execution. Operating in high-stakes project environments has enhanced my analytical thinking, attention to detail, and ability to translate technical information into actionable outcomes.

Previously, in my Business Analyst roles within banking and consulting environments, I supported stakeholders through requirements elicitation, documentation, issue tracking, and reporting activities. I facilitated communication between business units and technical teams, maintained project and requirements artifacts, and contributed to backlog refinement and change management processes to support informed decision-making and operational efficiency.

I am particularly drawn to this opportunity because it emphasizes analysis, collaboration, and continuous improvement—areas where I consistently add value. My combined field and analytical experience enable me to understand operational realities while delivering structured business insights that support organizational goals and solution effectiveness.

I would welcome the opportunity to discuss how my background and skills can contribute to your team's success.

Sincerely,
Kingsley Adequaye

12 March 2026

Hiring Committee
IT Services
Simon Fraser University
Burnaby, BC

Re: Business Analyst

Dear Team:

I am writing to apply for the Business Analyst position with SFU IT Services. With over a decade of business analysis, project management, and process improvement experience in complex organizations, combined with current advanced training in data analytics and systems analysis, I am confident I can contribute meaningfully to SFU's mission of advancing an inclusive and sustainable future through technology-enabled solutions. I am completing my Computing Studies and Information Systems: Data Analytics post-baccalaureate diploma at Douglas College in April 2026 and am available to begin in the first or second week of May.

In my recent Business Analyst Co-op role with Vancouver Coastal Health, I worked on medium-complexity clinical and operational projects that closely mirror the cross-functional, stakeholder-rich environment at SFU. I analyzed Emergency Department and UPCC visit data using ThoughtSpot and Cerner Discern, and applied statistical techniques such as t-testing to understand the impact of interventions on patient length of stay. I also mapped clinical workflows and gathered requirements for initiatives such as kiosk-based patient registration and wayfinding, using BPMN to document current and future-state processes. This experience strengthened my ability to translate business needs into clear, testable requirements and functional specifications, while collaborating with clinicians, managers, and technical teams.

Earlier in my career as a Business Analyst at Deutsche Bank, I supported the implementation of PnL reporting systems used by over 500 traders across the APAC region. I partnered closely with stakeholders to elicit requirements, design and refine reporting workflows, and lead user acceptance testing and training. Through significant process reengineering and VBA automation, I reduced daily reporting time by 92% (from 60 minutes to 5 minutes), demonstrating my focus on delivering measurable efficiency gains and robust data quality. This background has given me a strong grounding in working with enterprise-level applications in large, technically focused environments, and in managing change so that users adopt new tools successfully.

Beyond business analysis, I bring substantial experience in process improvement and project delivery. As Operations Manager at Cooee Inc. and Project Manager at Resources Connection Inc., I led cross-functional teams, reengineered onboarding and operational processes, and implemented low-cost digital solutions, such as a Google Suite-based applicant tracking system and integrated PMO scorecards. These initiatives reduced onboarding cycle time by 50%, generated significant cost savings, and improved visibility for leadership. I have consistently facilitated workshops, conducted gap analyses, and documented "as is" and "to be" processes, which aligns well with SFU's emphasis on business process reengineering and continuous improvement.

My academic work further reinforces my practical experience. I have earned top marks Dean's List with a 4.08/4.33 cumulative GPA in courses such as Systems Analysis & Design, Software Engineering, Database Systems, Data Analytics, Data Visualization, and Machine Learning. I have also completed an EMS data analytics and forecasting project through Riipen, giving me additional experience with real-world data, predictive modeling, and communicating insights to stakeholders. Complementing this are industry-recognized certifications, including IBM Business Analyst Professional, Google Project Management, Google Data Analytics, and Microsoft Office Specialist: Expert, which speak to my knowledge of requirements elicitation, testing and quality assurance, and change management best practices.

I am particularly drawn to SFU IT Services because of its focus on improving the digital experience for students, faculty, researchers, and staff. I believe my blend of business analysis, data analytics, BPMN-based process mapping, and stakeholder engagement experience positions me well to support the design and implementation of medium to large software solutions that deliver tangible value to the SFU community. I am enthusiastic about the opportunity to contribute to your projects, mentor stakeholders through change, and continue growing as part of a collaborative, innovative team.

Thank you for considering my application. I would welcome the opportunity to discuss how my background and skills can support SFU's academic and research mission.

Sincerely,

A handwritten signature in dark ink, appearing to read "Michaelangelo Adriatico". The signature is fluid and cursive, with the first name being more prominent.

RELEVANT WORK EXPERIENCE

STUDENT TEACHING ASSISTANT | Douglas College | BC, Canada

Jan 2025 - Apr 2026

- Teach students across multiple courses such as Excel, Web Development, Operating Systems, C# and Java programming
- Support students by troubleshooting code errors, exploring tool functionalities, and guiding problem-solving and knowledge discovery processes

BUSINESS ANALYST COOP STUDENT | Vancouver Coastal Health | BC, Canada

Aug 2025 - Dec 2025

- Analyzed ED and UPCC visits with ThoughtSpot & Discern Cerner to improve patient flow
- Tested syringe pump vs. mini bag impacts using statistical t-testing, showing reduced patient length of stay
- Mapped processes, gathered requirements, managed stakeholders, and presented on clinical projects

OPERATIONS MANAGER | Cooe Inc. | Makati, Philippines

Aug 2019 - Apr 2024

- Reengineered client onboarding process collaborating with 5 teams reducing cycle time by 50% from 4 to 2 weeks
- Designed Google Suite-based applicant tracking system achieving CAD 25,000 annual cost savings 100% ROI
- Built Dialogflow chatbot handling IT / HR / Marketing queries reducing response time by 90% for 100 employees

PROJECT MANAGER | Resources Connection Inc. | Makati, Philippines

Apr 2018 - Jul 2019

- Delivered P2P Standardization for Citibank and SAP B2B Implementation for Johnson & Johnson on schedule
- Improved project visibility by 80% by creating integrated PMO scorecards and risk mitigation plans
- Established communication protocols coordinating 20 member cross-functional teams across multiple time zones
- Facilitated stakeholder sessions and improved processes resulting in 35% reduction in project cycle time

CONSULTANT | AR Consulting Inc. | Makati, Philippines

Jan 2016 - Mar 2018

- Delivered comprehensive process documentation capturing 100 procedures for major energy sector client
- Conducted gap analysis identifying 25 improvement opportunities and recommended strategic technology solutions
- Led team of 5 business analysts while managing stakeholder relationships across 3 client organizations
- Developed detailed project plans and KPI tracking improving on-time delivery rate to 95%

BUSINESS ANALYST | Deutsche Bank | BGC, Philippines

Jan 2010 - Dec 2015

- Analyzed business requirements and implemented PnL reporting systems serving 500 traders across APAC region
- Achieved 95% first-time user adoption rate by conducting UAT sessions and delivered comprehensive training programs
- Reduced daily reporting time by 92% (60 to 5 minutes) by optimizing financial data workflows using VBA automation

Technical Summary

Work History

Bank of Montreal (BMO) – Toronto, Canada

Sep 2022 to Current

Lead Business Analyst / Lead Business Systems Analyst

Digital & Wealth Management (Online & Mobile) - [Agile & Waterfall]

Project: eTransfer Send Money & Request money enhancement, BMO Alerts, RRSP Calculator, BMO Smartfolio

- Led the delivery of business and technical requirements across multiple diverse projects using both PDLC (Waterfall) and Agile methodologies, ensuring accuracy to minimize project change requests (PCR).
- Organized and facilitated Scrum meetings, including Backlog Grooming, Sprint Planning, Daily Standups, Sprint Check-Ins, and Sprint Reviews & Retrospectives.
- Captured business requirements to assist the GAML team in adopting innovative digitization and automation opportunities.
- Conducted Gap Analysis between current and future state requirements, collaborating with the business to address identified gaps.
- Collaborated with technology partners to develop system requirements and design, ensuring alignment between business expectations and IT deliverables.
- Led, planned, and executed Business Acceptance Testing (BAT) and User Acceptance Testing (UAT).
- Managed a team of QA Analysts for BAT/PAT execution and defect management.
- Defined and implemented change management strategies in consultation with business leads to transition program changes into Business as Usual (BAU) operations.
- Supported multiple projects simultaneously, demonstrating exceptional prioritization and multitasking abilities.
- Collaborated with UI/UX teams to gather design requirements and ensure alignment between user experience goals and business objectives, acting as both a Business Analyst and Business Systems Analyst to facilitate effective communication and deliver user-centered solutions.
- Documented specifications using Behavior Driven Development (BDD) feature files to support agile practices.

Desjardins – Toronto, Canada

July 2019 to Aug 2022

Sr. Business Analyst / Sr. Business Systems Analyst

Digital & Wealth Management (Online & Mobile) - [Agile & Waterfall]

Project: Digital Wallet integration, Customer insights, Portfolio Tracking & Investment Analysis

- Assumed the role of Scrum Master and facilitated various Scrum ceremonies, including Daily Stand-Ups, Sprint Planning, Requirement Grooming Sessions, and Sprint Reviews & Retrospectives. Acted as the primary liaison between departments and development teams to gather requirements and business process information.
- Assisted in System Integration Testing (SIT), Production Implementation Verification (PIV), regression testing, and performance testing, ensuring comprehensive defect resolution.
- Participated in release planning and collaborated with the release management team for Client Facing Launches (CFL).
- Collaborated with UI/UX teams to gather design requirements and ensure alignment between user experience goals and business objectives, acting as both a Business Analyst and Business Systems Analyst to facilitate effective communication and deliver user-centered solutions.
- Facilitated requirement walkthroughs with a larger group over 25+ team members both internal & external Business & IT Stakeholders.
- Documented user stories along with Acceptance criteria, business Use Cases on Jira & Confluence, Facilitate prioritization, iteration/sprint planning and release planning sessions.
- Supported BA & QA support to multiple Tier 1 - 5 projects/programs, to accomplish project deliverables within established schedule, scope and budget.
- Captured requirements to meet with proper AML Compliance (Global Standard) Guidelines in compliance with sanction and non-sanction screening also to ensure business expectations are meeting with system implementation.
- Performed Gap Analysis between Current & Future State Requirements and reviewed Gaps with the business to resolve.
- Analyzed data, document data definition between current and new systems; built report requirements wherever essential, document reporting/data processes where needed.
- Engaged with functional partners (privacy, risk, compliance, etc.) to capture and understand requirements, achieving timely sign-off.
- Planned deliverable implementations and change management ensuring enough time interval and communication to alter business processes, prepare impacted associates, maintained founded documentation and adhere to change control standards.
- Managed long run client relationship, anticipating and addressing underlying needs, proactively adding value to products, services and processes.
- Provided ongoing assistance and expertise of systems and products, diagnosing problems and aiding in the development of solutions. Coordinated with the users and relevant technology teams to ensure the prompt resolution of day-to-day handling difficulties and issues. Maintain a high degree of quality service with minimum impact to business and our clients.

Business Analyst / Business Systems Analyst

Digital, Wealth Management & AML (Online & Mobile) - [Agile & Waterfall]

Project: Cheque Capturing Functionality, edeposit Mobile Application, LCTR, STR, Investment Calculator

- Facilitated requirement walkthroughs with a larger group over 25+ team members both internal & external Business & IT Stakeholders.
- Documented user stories along with Acceptance criteria, business Use Cases on Jira & Confluence, Facilitate prioritization, iteration/sprint planning and release planning sessions.
- Supported BA & QA support to multiple Tier 1 - 5 projects/programs, to accomplish project deliverables within established schedule, scope and budget.
- Captured requirements to meet with proper AML Compliance (Global Standard) Guidelines in compliance with sanction and non-sanction screening also to ensure business expectations are meeting with system implementation.
- Conducted Gap Analysis between current and future state requirements, collaborating with the business to address identified gaps.
- Contributed to the RAID (Risks/Assumptions/Issues/Decisions) log by proactively identifying gaps and proposing risk mitigation strategies.
- Collaborated with technology partners to develop system requirements and design, ensuring alignment between business expectations and IT deliverables.
- Led, planned, and executed Business Acceptance Testing (BAT) and User Acceptance Testing (UAT).
- Collaborated with technology partners to develop system requirements and design, ensuring alignment between business expectations and IT deliverables.
- Led, planned, and executed Business Acceptance Testing (BAT) and User Acceptance Testing (UAT).
- Engaged with functional partners (privacy, risk, compliance, etc.) to capture and understand requirements, achieving timely sign-off.
- Managed a team of QA Analysts for BAT/PAT execution and defect management.
- Documented speck by example (BDD feature files) to support behavior driven development.
- Supported SIT (System Integration testing), PIV (production implementation verification), Regression testing, performance testing and ensure end to end resolution of defects.
- Defined and executed change management, in consultation with business lead, to ensure changes introduced to program are transitioned into BAU (business as usual)

Education

Bachelors in Electronics and Communication in CMR college.

Certifications

- Certified Scrum Master®
- Six Sigma Certified

Professional Summary

Business System Analyst with over 8 years of experience leading business transformation, process optimization, and system implementation initiatives across healthcare, insurance, banking and enterprise environments. Skilled in Agile (Scrum), Waterfall, and Hybrid methodologies with proven ability to implement project management best practices, manage requirements, work flows, facilitate UAT, prepare release readiness, and oversee full lifecycle delivery. Recognized for bridging the gap between business and IT teams, facilitating workshops, and driving collaboration to deliver projects on time, within scope, and on budget. Brings strong expertise in data driven decision making, risk identification and mitigation, change impact assessment, and enabling continuous improvement across business systems.

Experience:

Key West Ford Motors (Contract)

Lead Business Analyst (Inventory Workflow Optimization)

Jul 2025 – Present

- Leading end-to-end redesign of the inventory tracking and reporting process, improving visibility and accuracy across sales and operations and enabling more informed, timely management decisions.
- Defining and implementing standardised inventory KPIs and data governance practices, improving the reliability of reporting, and enabling leadership to track performance trends, identify risks early, and maintain consistent inventory control post-implementation.
- Driving Agile delivery through structured stakeholder collaboration, Scrum ceremonies, and coordinated testing, resulting in smoother releases, higher user adoption, and stable post-implementation operations.

Freelance – Project Manager/Lead Business Analyst (Contract)

(Design & Implementation of Virtual Assessment Simulation Lab)

Aug 2023 – Mar 2025

- Drove the analysis and solution design for a virtual healthcare simulation lab used to validate post-training clinical competency, converting clinical, regulatory, and assessment needs into structured scenarios, workflows, and scoring models that supported consistent and defensible certification decisions.
- Collaborated closely with clinical experts, assessment authorities, and technical teams to shape simulation logic, evaluation criteria, and decision pathways, improving the objectivity, accuracy, and auditability of candidate assessments in line with accreditation requirements.
- Contributed to Agile delivery by producing clear requirements, supporting UAT, validating data and APIs, and facilitating stakeholder reviews, enabling a stable, scalable assessment platform with strong user adoption and smooth post-implementation operations.

HCL Technologies / Thryve Digital LLP & Health Net (Onsite – Full Time)

Project Manager/Lead Business Analyst (Change Agent)

May 2022 – Apr 2023

- Led structured change management initiatives using Prosci ADKAR principles, aligning stakeholders across business, operations, and IT to ensure compliant, well-adopted process and system changes with minimal disruption to day-to-day operations.
- Strengthened delivery governance by clarifying scope, validating change requests, and coordinating with PMO stakeholders, resulting in controlled change execution, reduced delivery risk, and sustained alignment with regulatory and operational objectives.

Cognizant Technology Solutions / PeopleSoft HCM, USA (Remote – Full Time)**Sr. Business Analyst (HCM Workflow Automation)****Feb 2020 – Apr 2022**

- Led the analysis and automation of PeopleSoft finance, payroll, and HR workflows using UiPath, improving data integrity, reducing manual processing, and enabling more consistent, unified reporting across functions.
- Aligned business rules, compliance requirements, and functional design across finance, payroll, and HR stakeholders, resulting in smoother automation adoption, fewer downstream exceptions, and improved process reliability.
- Coordinated testing, validation, and controlled release of automated workflows, ensuring business sign-off, minimal post-deployment issues, and stable integration with existing PeopleSoft processes.

Cognizant Technology Solutions / J&J - E-Commerce Project UK (Remote - Full Time)**Sr. Business Analyst (D365 CRM Transformation)****Dec 2018 – Jan 2020**

- Led the migration of J&J's legacy eCommerce platform to Microsoft Dynamics 365, integrating sales, service, and marketing functions, which improved data consistency and enabled more timely, data-driven business decisions across teams.
- Ensured comprehensive requirement capture by documenting as-is and to-be process flows, including system integration wireframes, to translate complex workflows into clear, understandable models for non-technical stakeholders.
- Supported post-go-live optimization initiatives that contributed to 5–8% improvement in response times and a 3–5% uplift in conversion and repeat customer engagement, supporting a positive return on the transformation investment.

Cognizant Technology Solutions - Network Rail - UK (Remote - Full Time)**Sr Business Analyst (PIS Enhancement)****Oct 2017 – Nov 2018**

- Conducted a structured assessment of the existing Passenger Information System (PIS), identifying system inefficiencies and data alignment gaps, and developed high-level process flows that guided targeted enhancements to improve the accuracy and timeliness of passenger travel information across stations.
- Supported the optimization of data synchronization and user interface workflows, reducing delays in information dissemination and improving the reliability of public communications during peak traffic and service disruption scenarios.

Cognizant Technology Solutions / Royal Bank of Scotland, USA (Remote - Full Time)**Business Analyst (Digital banking Security Upgrade)****Jun 2016 – Sep 2017**

- Conducted a security gap assessment of RBS's digital banking platform and defined a multi-factor authentication (MFA) workflow, strengthening access controls, reducing unauthorized access risk, and improving customer confidence in online transactions.
- Developed detailed authentication flow wireframes and mock-ups, aligning user experience, technical design, and regulatory requirements to support secure, compliant, and user-friendly digital banking interactions.

Cognizant Technology Solutions / Anthem BlueCross and BlueShield, USA (Remote - Full Time)**Business Analyst (Enrollment Workflow Optimization)****May 2013 – Jun 2016**

- Analyzed enrollment data trends and patterns to identify key process bottlenecks, enabling targeted interventions that reduced turnaround time for member onboarding.
- Partnered with stakeholders to redesign workflows and automate verification steps, accelerating member activation and enhancing customer satisfaction scores.
- Defined and tracked key enrollment performance metrics and reporting controls to ensure ongoing visibility into onboarding outcomes, helping teams quickly identify issues, sustain reduced turnaround times, and maintain consistent service quality.

Skillset

Project Planning, Status Reporting & Delivery Coordination
Requirement Gathering, Workshop Facilitation
Sprint Planning, Backlog Refinement, UAT Support
Process Mapping/Wireframing, Future-State Design & Impact Assessment
User Stories, Use Cases & Functional Specifications
Agile (SCRUM), Waterfall & Hybrid Project Delivery
Stakeholder Engagement, Cross-Functional Collaboration
Change Management (Prosci), Training Support & Adoption Readiness
Post-Implementation reviews, Lessons Learned and Continuous Improvement
Strong Analytical Thinking, Problem Solving & Attention to Detail

Education

MBA (International Business)

Trinity Western University, Vancouver, Canada, Sep/2023 – May/2025

MBA (Business Analytics)

Alliance Business School, Hyderabad, India, Aug/2018 – Oct/2020

Certifications:

PMP – Project Management Professional (PMI)

Canda – West Coast Chapter
Nov, 2025

CBAP – Certified Business Analyst Professional (IIBA)

Hyderabad, India
July, 2021

CSM – Certified Scrum Master (Scrum Alliance)

Hyderabad, India
July, 2020

PRINCE – 2 Project Management (Axelos)

Hyderabad, India
July, 2017

Six Sigma Green Belt (SSGB) - ISI (Indian Statistical Institute)

Hyderabad, India
December, 2011

Srishti Agarwal

+ Vancouver, BC, Canada srishti.112000@gmail.com [linkedin.com/ in/ SrishtiAgarwal](https://www.linkedin.com/in/SrishtiAgarwal)

Education

University of British Columbia

2024 – 2025

Master of Arts in Economics

- **Coursework:** Econometrics, Quantitative Economics & Data Science, Research Design & Policy Evaluation, Industrial Organisation, International Trade, Environmental Economics

Lady Shri Ram College for Women, University of Delhi

2019 – 2022

Bachelor of Science (Honours) in Statistics

- **Coursework:** Probability & Stochastic Processes, Time Series, Design of Experiments, Multivariate Analysis, Financial Stats

Experience

University of British Columbia – Graduate Teaching Assistant

Nov 2024 – Apr 2025

Courses: "International Economic Relations" & "International Finance"

- Cleared course concepts for students & assisted professors in developing exam questions
- Held weekly office hours & graded final exams for 80+ students

Kajaria Ceramics – Business Analyst

Sept 2022 – Aug 2024

India's largest manufacturer of ceramic/ vitrified tiles

- Improved forecast accuracy using Python and SQL for dealer-level demand in 3 tier-1 cities by 14%
- Designed Power BI dashboards integrating ERP and sales feeds for 600+ dealers, reducing monthly reporting time from 5 days to under 1 day
- Automated data-quality checks in SQL to detect pricing and SKU errors in dealer orders, reducing credit-note corrections by 28%
- Conducted pricing-elasticity simulations in Python across 3,500+ SKUs, identifying under-performing product lines

India Ultimate – Part Time Consultant

Nov 2022 – May 2023

Women's Ultimate Fellowship, Flying Disc Sports Federation of India

- Built an investor deck opening 10 funder conversations and securing \$25,000 CAD across 4 sponsors
- Modelled a recruitment and outreach framework that grew applications by 56% and expanded cohort diversity to 10 provinces
- Designed the Year-2 track with coached community projects and M&E, launching 8 fellow-led projects serving 280 beneficiaries

Centre for Civil Society – Research Intern

June – Sept 2022

World's # 83 liberal think tank (UPenn 2021) advancing social change through economic policy

- Analyzed legal documents, conducted stakeholder surveys, & performed primary research in 5 markets of Delhi
- Published a [research paper 2](#) assessing the on ground formalisation level of India's street-vending markets in the annual journal

BeastNudge Global – Behavioural Economist Intern

Nov 2021 – Feb 2022

Behavioural Economics and Science Team

- Designed primary research questionnaires grounded in the Theory of Planned Behaviour and conducted competitor analysis
- Led 28 interviews, developed behavioural personas, & proposed interventions to improve enrollment in a certificate program

Projects

Impact of Carbon Tax on CO₂ Emissions in Japan

June – Aug 2024

- Conducted an empirical evaluation of Japan's 2012 carbon tax using Synthetic Control Method (SCM) over a 30-year panel dataset to estimate causal effects on transport-sector CO₂ emissions
- Delivered policy recommendations emphasizing the need for higher tax rates, broader sectoral coverage, and complementary investment in cleaner technologies

Skills

Software: R, Python (pandas, NumPy, scikit-learn, Matplotlib, Tensorflow, PySpark), SQL, Tableau, Power BI, MS-Excel

Research: Research Design, Literature Review, Stakeholder Interviews, Policy Evaluation, Academic Writing, Survey Design

Bahareh Aghababaei

Vancouver, Canada | (236) 514-1372 | bahar.aghababaeii@gmail.com

LinkedIn: <https://www.linkedin.com/in/bahareh-aghababaei> | GitHub: <https://github.com/BaharAghababaei>

SUMMARY

Business Analyst with an **MSc in Business Administration (UBC Sauder)** and **3+** years of experience supporting cross-functional teams through **requirements elicitation**, business process **analysis**, and solution design in complex operational environments. Experienced in **documenting** workflows, **facilitating** process improvement, and **translating business needs** into clear functional specifications for technology solutions. Strong analytical background with working knowledge of **SQL** and **Power BI** to support data-informed decision-making. **Detail-oriented** and **collaborative**, with a strong interest in enabling effective, scalable enterprise solutions in academic and institutional settings.

TECHNICAL SKILLS

Languages: Python (3+ years), SQL (3+ years), R (2+ years)

Data Analysis: Pandas and NumPy, Scikit-Learn, Matplotlib

Visualization & BI: Power BI, Tableau, Excel (PivotTables, Power Query)

PROFESSIONAL EXPERIENCE

Data Science Graduate Researcher | *UBC Sauder School of Business*

2022 – 2024

Amazon Network Optimization | *Python, Pandas, Excel, Matplotlib*

- Executed end-to-end **data preparation** and validation across customer, product, and warehouse datasets to support business analysis, ensure **data accuracy**, and enable reliable decision-making across inventory and fulfillment operations.
- Analyzed fulfillment network and inventory placement scenarios to support **operational planning** and process improvement, delivering recommendations that reduced planning complexity and improved efficiency by **50%**.
- Developed clear analytical **summaries**, **visualizations**, and **documentation** to communicate findings and translate complex operational data into actionable business insights.

Vancouver Port Analysis | *MySQL, Power BI*

- **Extracted, cleaned, and analyzed** five years of **multi-source** operational datasets using **advanced SQL** (CTEs, JOINS, stored procedures); applied **advanced statistical techniques** to identify **trends** and key factors contributing to changes in operational KPIs.
- Designed an **interactive Power BI dashboard** using **Power Query** and **DAX** to identify operational **trends** and track **KPIs**; identified a **78%** drop in vessel departures and **52%** reduction in tonnage loaded during heavy rainfall, delivering **actionable business insights** for operational planning.

Urban Ride-Sharing Analysis | *Python, Pandas, Matplotlib*

- **Processed and analyzed** ride-sharing transaction data to evaluate **operational patterns**, **user behavior trends**, and **service performance drivers**.

- Defined and tracked **key business metrics** (e.g. shareability rate, match efficiency), achieving up to **37%** reduction in travel time and **45%** reduction in congestion; **visualized** trends to identify user **behavior patterns** and guide product and **service design**.

Data Analyst | Tehran Bus Company

2020 – 2022

- Extracted, transformed, and analyzed** large financial and operational datasets from public transit systems using **SQL** to support performance analysis and planning.
- Developed **statistical models** for **demand forecasting**, contributing to fleet assignment optimization that improved vehicle utilization by **~20%**.
- Conducted **KPI** analysis and **benchmarking** against **10** global transit systems to identify major cost drivers and revenue gaps; developed **Power BI dashboards** to visualize trends and insights to senior leadership.

Optimization Graduate Researcher | Iran University of Science & Technology

2016 – 2019

- Designed and validated two advanced **quantitative models** to improve **resource allocation** and **supply planning**, applying mathematical programming and simulation techniques to support more efficient and resilient operations.
- Translated complex modeling results into **clear insights** for decision-makers through **analytical reporting** and **visualizations**.

PERSONAL PROJECT

Sales & Customer Dashboard | Tableau

2025

- Designed and built an **interactive Tableau dashboard** using synthetic sales and customer data (2020–2023) to track **KPIs**, **trends**, and customer behavior; enabled **dynamic filtering** by product and location for business-focused insights.

EDUCATION

MSc in Business Administration- GPA:4/4

2022 – 2024

UBC Sauder School of Business

Vancouver, Canada

MSc in Industrial Engineering- GPA: 4/4

2016 – 2019

Iran University of Science & Technology

Tehran, Iran

Award: Recognized as the Best Practical Thesis from the Iran Institute of Industrial Engineering

BSc in Industrial Engineering

2011 – 2015

Bu-Ali Sina University

VOLUNTEER EXPERIENCE

Data Scientist | Data for Good – Vancouver Chapter

2025 – Present

- Contributing to projects involving data cleaning, analysis, visualization, and the development of actionable, data-driven solutions for community impact.

Reyhaneh Ahani

Vancouver, BC (Willing to Relocate) | +1 (236) 866-7611 | raa112@sfu.ca | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Education

Simon Fraser University

Canada, Vancouver

Master of Computer Engineering | **GPA: 4.08/4.30**

01/2025 - 06/2026

Amirkabir University of Technology

Iran, Tehran

Bachelor of Electrical Engineering & Minor in Computer Engineering | **GPA: 3.94/4.00**

09/2019 - 09/2023

Skills

Languages: Python, R, C/C++, SQL, Bash, MATLAB

MLOps & Cloud: AWS (ECS, EC2, SageMaker), Docker, Git/GitHub Actions, CI/CD, Weights & Biases, SLURM, Linux, Spark

AI & Frameworks: PyTorch, TensorFlow, JAX, Scikit-Learn, OpenCV, NumPy, Pandas, SciPy, Hugging Face, Gym, LangChain, LangGraph, DSPy, Pytorch3D, MLFlow, DVC, Agentic AI, MCP, Fine Tuning LLMs and VLMs, Transformers, Transfer Learning, Model Alignment, Prompt Engineering, Explainable AI, Anthropic Agent SDK, Bayesian Inference

Software Engineering: OOP, Design Patterns, Testing, FastAPI, REST API, Next.js, Prisma ORM, Vercel, Flask

Analytics & Tools: Tableau, Power BI, Figma, Papermill, Label Studio, Excel

Relevant Experience

Big Data Analyst | Big Data Hub

02/2025 - Present | Canada, Vancouver

- Architected a scalable **ETL pipeline using PySpark** to integrate **7M+ records** of Telus mobility and GIS boundaries into an **AWS S3 data lake**, resolving temporal inconsistencies to ensure hourly resolution for lakes in Alberta.
- Developed and trained **predictive GLMMs** in Python and R to correlate mobility signals with angler activity, leveraging **MLflow** for production observability identifying features that improved baseline accuracy by **over 95%**.
- Extracted and integrated high-dimensional spatial features using **GeoPandas**, successfully reducing unexplained between-lake variance by **42%** while validating generalization via robust **leave-one-lake-out cross-validation** pipelines.
- Deployed the validated zero-shot prediction model as a **Dockerized** FastAPI microservice, generating hourly forecasts for unmonitored lakes and accelerating fisheries resource planning cycles by **80%**.
- Translated complex predictive estimates into **automated interactive BI dashboards**, guiding strategic decision-making.

Graduate Research Assistant | Simon Fraser University

01/2025 - Present | Canada, Vancouver

- Designed **LangDepth**, a language-guided monocular depth estimation framework fusing **CLIP spatial embeddings** with a partially unfrozen **SAM encoder** via **FiLM modulation**, making language a non-bypassable driver of prediction.
- Achieved $\delta_1 = 0.955$ on NYU Depth V2 with strong **zero-shot transfer** across iBims-1, SUN RGB-D, and DIODE Indoor. (Manuscript in prep. for WACV 2027)
- Developed a **parameter-efficient** CLIP adaptation strategy for depth estimation, combining lightweight Mixture-of-Adapters with selective **ViT fine-tuning** and a global semantic context vector for spatially-aware depth map.
- Designed and benchmarked multimodal fusion architectures across NYU, iBims-1, SUN RGB-D, and DIODE, establishing systematic no-text vs. language-guided ablation protocols to quantify language contribution to depth accuracy.

Graduate Applied Researcher | Simon Fraser University

12/2025 - Present | Canada, Vancouver

- Engineered a modular RAG pipeline using **LangGraph** and **Pydantic** for strict schema validation, scaling to **100M+ records** with dynamic multi-agent routing.
- Optimized retrieval accuracy via custom chunking strategies tailored for legal readability, while architecting **deep search routing architectures** and **automated verifier modules** with recursive self-correction to enforce strict **factual grounding** and eliminate LLM hallucinations.

Machine Learning Engineer | Metra Consultant Company

01/2024 - 12/2024 | Iran, Tehran

- Developed and deployed ML models as **scalable FastAPI REST endpoints** for transportation logistics that optimized **route planning**, leading to a **15% reduction** in **operational costs** and travel time across road and rail networks.
- Created **predictive tools** for route planning, **cost estimation**, and **efficiency analysis** using spatiotemporal data.
- Resolved model drift and noise by leading workshops to co-design robust label schemas and validation protocols.

Data Scientist Intern | Human Gene

06/2022 - 09/2022 | Iran, Tehran

- Developed bioinformatic diagnostic tools and NGS pipelines using papermill for data analysis to identify inherited diseases.
- Built gene frequency calculators and mutation distribution visualizations using Python to process over **100GB+ of NGS data**, optimizing gene-disease association analysis and accelerating data processing for clinical researchers.

Projects

LLAMA3 RAG Chat-Bot | GitHub

- Developed a **modular Agentic AI chatbot** utilizing **Llama 3**, **LangGraph**, and **LangChain**, implementing a state-driven architecture for complex, **context-aware multi-turn interactions**.
- Built a **hybrid RAG pipeline** combining BM25 lexical search and **FAISS vector retrieval** with **Hugging Face embeddings**, incorporating **relevance filtering** to minimize hallucinations.

AI Multimodal Shopping Assistant | GitHub

- Developed a **real-time multimodal shopping assistant** utilizing **Next.js**, **TypeScript**, and **Gemini Flash**, enabling instant visual product comparisons through advanced vision-language modeling.
- Built a **non-blocking PostgreSQL pipeline** and implemented **client-side image compression**, decoupling AI inference from data persistence to achieve a low-latency user experience.

Yash Ahlawat

Vancouver, BC | 437-299-2337 | yashahlawat20@gmail.com

March 17, 2026

Hiring Manager
Simon Fraser University

Dear Hiring Manager,

I am writing to express my interest in the Business Analyst position with SFU IT Services. With over five years of experience supporting enterprise systems, application delivery, and business analysis in complex environments, I bring strong capabilities in requirements elicitation, process analysis, and Agile delivery that align closely with this role.

In my role as a Business Systems Analyst with the Idaho Department of Health and Welfare, I supported a large-scale enterprise system modernization initiative. I gathered and documented business requirements through BRDs and PRDs, developed user stories, and collaborated with cross-functional teams to deliver system enhancements. I also led testing efforts including UAT, regression, and end-to-end testing, ensuring alignment between system functionality and business requirements.

I have hands-on experience working in Agile Scrum environments using Azure DevOps, Jira, and Confluence, and I am comfortable facilitating collaboration between business stakeholders and technical teams. My experience using SQL, Power BI, and Visio has allowed me to analyze system data, model business processes, and support data-driven decision-making and process improvement initiatives.

Currently, as a Network Analyst, I support enterprise systems across multiple locations, ensuring system availability, resolving incidents using ITIL practices, and maintaining operational continuity. This experience has strengthened my ability to work in fast-paced environments while maintaining a strong focus on system reliability and user support.

I am particularly drawn to this opportunity at SFU because of its commitment to innovation and improving digital experiences for students, faculty, and staff. I am excited about the opportunity to contribute to meaningful projects that enhance system efficiency and support academic and operational excellence.

Thank you for your time and consideration. I look forward to the opportunity to contribute to SFU IT Services.

Sincerely,
Yash Ahlawat

Yash Ahlawat

Vancouver, BC | 437-299-2337 | yashahlawat20@gmail.com | Canadian Permanent Resident

PROFESSIONAL SUMMARY

Applications and Systems Analyst with 5+ years of experience supporting enterprise systems, applications, and operational workflows in large-scale environments. Skilled in application lifecycle management, troubleshooting production issues, and collaborating with business and technical stakeholders to support process improvement and system optimization. Experienced working in Agile Scrum and DevOps environments using Azure DevOps, Jira, and Confluence, supporting the full SDLC from requirements gathering and documentation through testing, deployment, and operational support. Strong background in ITIL-based incident and problem management and application monitoring.

CORE COMPETENCIES

Application Support, Application Lifecycle Management, SDLC, Agile Scrum, DevOps, ITIL Service Management, Enterprise Systems Support, Enterprise Application Troubleshooting, Root Cause Analysis, Stakeholder Collaboration, System Documentation

TECHNICAL SKILLS

Business & Systems Analysis

Requirements gathering, Business Requirements Documents (BRD), Product Requirements Documents (PRD), user stories, workflow documentation, stakeholder analysis, process modeling.

Agile & DevOps Tools

Azure DevOps, Jira, Confluence, Agile Scrum methodology, sprint planning, backlog grooming, daily stand-ups, sprint reviews, defect triage meetings.

Testing & Quality Assurance

User Acceptance Testing (UAT), regression testing, smoke testing, end-to-end testing, test case creation, defect tracking.

Microsoft Technologies

Microsoft 365 platform, SharePoint, Microsoft Power BI, Microsoft Visio, Microsoft Project, Microsoft Excel, Windows environments.

Data & Programming

SQL (data queries and validation), Python, JavaScript.

IT Operations

ITIL framework, incident management, problem management, enterprise application monitoring.

PROFESSIONAL EXPERIENCE

Network Analyst –Network Operations Centre | PATTISON Outdoor Advertising | Feb 2023 –Jan 2026

□ Provided technical support for enterprise systems and applications supporting operational workflows across 50+ locations.

□ Monitored application and infrastructure performance, responding to operational alerts affecting system availability.

- ❑ Investigated incidents impacting application reliability and collaborated with internal teams to restore service.
- ❑ Provided support for user access issues and system-related requests, ensuring minimal disruption to operations.
- ❑ Followed ITIL-based incident and problem management practices to log, track, and resolve issues.
- ❑ Documented troubleshooting procedures and system configurations to support operational knowledge sharing.

Junior Technical Application Specialist | Doing Things Simply Inc. | Sep 2021 – Feb 2023

- ❑ Provided technical support for enterprise applications diagnosing configuration and connectivity issues.
- ❑ Assisted with application troubleshooting during deployments, updates, and integrations.
- ❑ Supported remote access environments and collaborated with IT teams to resolve production issues.
- ❑ Developed documentation, user guides, and knowledge base articles to support operational teams.

Business Systems Analyst | Idaho Department of Health & Welfare | Jun 2019 – Dec 2020

- ❑ Gathered and analyzed business requirements through stakeholder discussions and documented them in Business Requirements Documents (BRDs) and Product Requirements Documents (PRDs).
- ❑ Developed user stories, backlog items, and acceptance criteria using Azure DevOps to support Agile software delivery.
- ❑ Participated in Agile Scrum ceremonies including daily stand-ups, sprint planning, backlog refinement, sprint reviews, and retrospectives.
- ❑ Collaborated with cross-functional teams including developers, QA engineers, and subject matter experts to ensure accurate implementation of business requirements.
- ❑ Conducted User Acceptance Testing (UAT), regression testing, smoke testing, and end-to-end testing for enterprise application releases.
- ❑ Authored detailed test cases and test scripts to validate system functionality and ensure requirement coverage.
- ❑ Logged and tracked defects in Azure DevOps and participated in weekly defect triage meetings to review severity, priority, and resolution plans.
- ❑ Used SQL queries to validate application data and identify anomalies during testing and validation cycles.
- ❑ Developed workflow diagrams and business process models using Microsoft Visio, including BPMN-style process mapping, to support system analysis, documentation, and process improvement initiatives.
- ❑ Analyzed existing business processes and identified opportunities for process improvement, contributing to more efficient system workflows and enhanced user experience.

❑ Created project documentation, user guides, and knowledge transfer materials for stakeholders and operational teams.

❑ Worked with Microsoft Power BI and Excel to analyze system data and support reporting requirements.

❑ Utilized collaboration tools such as Jira and Confluence to manage project documentation and track development activities.

❑ Coordinated closely with QA and development teams to reproduce issues, validate fixes, and support release readiness.

EDUCATION

Bachelor of Science – Applied Mathematics & Computer Science | University at Buffalo

Advanced Diploma – Computer Systems Technology & Networking | Centennial College

CERTIFICATIONS

Microsoft AI Product Manager Certification — In Progress (Expected Completion: April 2026)

AANII AHMED

BUSINESS ANALYST

250-986-5677

aanii.t.ahmed@gmail.com

www.linkedin.com/in/aanii-ahmed

Victoria, BC

PROFESSIONAL OVERVIEW

Business Analyst with a Bachelor of Science in Health Information Science and 5+ years of experience supporting enterprise systems and digital solutions. Skilled in business process analysis, workflow documentation, and system onboarding for large, cross-functional teams. Experienced in using Jira, ServiceNow, and Salesforce Lightning to track tasks, resolve issues, and improve operational efficiency. Collaborative, detail-oriented, and adept at translating technical requirements into actionable solutions to support organizational goals.

WORK EXPERIENCE

Virtual Care Analyst

Island Health | Nov 2023 — May 2024 | Victoria, BC

- Developed training guides and Visio workflows for 10+ sites, accelerating staff onboarding and improving virtual care adoption.
- Owned Jira ticket management for virtual care projects, tracking tasks, assigning responsibilities, and ensuring timely resolution across the team.
- Streamlined NP onboarding by collaborating with Lead Nurses and Virtual Care Specialists, reducing workflow errors and enabling peer-to-peer training.

Systems Support Specialist

ICON PRA Health Sciences | Jan 2021 - Oct 2023 | Victoria, BC

- Managed provider data imports in Salesforce Lightning, ensuring accurate site and provider information and minimizing clinical trial delays.
- Identified process gaps and updated internal guides, standardizing workflows and improving ticket accuracy across teams.
- Provided ad hoc troubleshooting and system support via Teams, resolving issues promptly and enhancing user efficiency.

Business Systems Analyst

Fraser Health Authority | Oct 2019 — Sep 2020 | Surrey, BC

- Triaged UCI Clinical Viewer access issues, maintaining operational continuity for multiple clinics.
- Monitored error logs and system reports, identifying recurring problems and escalating critical issues to technical teams.
- Coordinated onboarding and account setup across clinics, ensuring successful adoption and reducing access delays.

EDUCATION

Bachelor's degree, Health Information Science | University of Victoria | June 2019

SKILLS

- | | | |
|---------------------------------------|--|---|
| • Customer Support & Issue Resolution | • Documentation & Process Standardization | • Problem-Solving & Analytical Thinking |
| • Ticket Management & Workflow Triage | • Cross-Team Collaboration & Communication | • Stakeholder Engagement |
| • Onboarding & Training End Users | • Prioritization & Time Management | • Workflow Optimization & Process Improvement |

Fahmida Ahmed

Vancouver, BC | 7092192212

fahmidaahmed.ca@gmail.com

I'm someone who takes ideas from concept to reality. I've led projects across operations, focusing on strong systems, thoughtful collaboration, and outcomes that last.

Experience

Registration Officer

British Columbia Institute of Technology, Burnaby

August 2023 - Present

- Led Criminal Record Check compliance for **40,000 students**, coordinating with the Ministry of Public Safety and academic teams to enable final program acceptance.
- Managed institution wide registration operations, including course withdrawals and **2,500+ staff tuition waiver cases**, ensuring data accuracy in Banner and meeting critical deadlines.
- Identified and resolved payment discrepancies with Finance, safeguarding **millions in tuition revenue** through proactive reconciliation.
- Led a role reclassification initiative by redefining scope and responsibilities, resulting in a successful pay upgrade and **Service Excellence Award (2024)**.

Founder

Roasty Toasty Bengali, Vancouver, BC

May 2020 - Present

- Built and scaled a community driven food initiative reaching **10,000+ people**, leading media strategy, digital storytelling, and delivery of large scale municipal events and workshops.
- Planned and executed community programs and pop ups, coordinating partners, vendors, timelines, and logistics to deliver inclusive food experiences.
- Developed cross sector partnerships with local NGOs, municipalities, and national organizations, including **Canada's Food Guide** and **Food Banks Canada**.
- Secured **\$5,000+ in first year funding** and launched programs addressing food access gaps and community engagement.

Executive Director of Finance and Services

Memorial University Student Union, St. John's, NL

May 2021 - April 2022

- Directed an **\$800K capital renovation project**, overseeing scope, procurement, contractor coordination, governance approvals, and financial controls through all project phases.
- Led union wide financial and operational strategy, managing budgets across **4 major student services**, the student bar, equity initiatives, and a **\$6M Health and Dental Plan**.
- Chaired recruitment and workforce planning, leading hiring for **80 student employees and 5 full time staff**, and managing annual budget distribution for all clubs and societies.
- Initiated cost optimized programs including a campus grocery shuttle and clothing drives, mobilizing committees and stakeholders to serve **19,152 students**.

Education

Bachelors in business administration | September 2018 - December 2022

Memorial University of Newfoundland and Labrador

Technical Skills Certifications

Certificate in Digital Marketing

March 2026

Brain Station

- Build end to end digital marketing strategies by defining customer personas and journeys, and creating clear, persuasive content and campaigns.
- Use SEO, paid search, social media, email marketing, analytics, and AI tools to drive measurable growth, optimize performance, and make data informed decisions.

Certificate in Data Analytics

January 2024

Brain Station

- Gained hands-on experience in data modeling, SQL, Excel, and Tableau for business insights and decision-making.
- Completed a capstone project focused on presenting data-driven insights to technical and non-technical audiences.

Dear Hiring Committee,

I am applying to SFU because I am drawn to work that requires thoughtful coordination, and the ability to move initiatives forward. Throughout my career, I have taken on projects that required structure, persistence, and steady leadership across multiple stakeholders.

At Memorial University, I served as Finance Director and oversaw an operational budget of approximately 800,000 dollars. Beyond managing allocations and mid-year adjustments, I helped generate new revenue strategies for a space that had experienced years of loss. The project involved financial planning, stakeholder coordination, and long-term redevelopment thinking. Today, that renovated space serves over 25,000 students and includes inclusive upgrades such as a dry bar, accessible washroom facilities, pop-up café spaces for local businesses, and designated areas for student associations to increase engagement and foot traffic. It required balancing budget realities with community needs and long-term sustainability.

At BQT, I lead all staff registration processes, working closely with HR, IT, academic departments, and the Registrar's Office. I coordinate workflow approvals, develop visual process guides for new faculty onboarding, and manage high-volume compliance requirements. A significant part of my portfolio involves overseeing criminal record documentation for Health Sciences programs. On average, I review over 300 records per week, ensuring careful assessment of each file to protect vulnerable adults and children when students enter practicum settings such as hospitals. The work requires discretion, policy interpretation, and strong risk awareness. I am accountable for ensuring that no student proceeds without proper clearance, maintaining alignment with institutional and ministry.

In addition to my operational responsibilities, I support the department's front-facing function whenever required. Our team consists of five officers and a supervisor, who primarily oversees the day-to-day frontline workflow. We collectively ensure service continuity for a team of 12 customer service representatives, particularly when managing staff absences or periods of high demand. We take turns providing oversight and coordination, balancing frontline management with our individual project portfolios. As a result, I regularly move between frontline coordination and project delivery to maintain consistent service standards.

One of the most rewarding initiatives I led at BQT was a long-standing staff job reassessment project that had remained unresolved for nearly a decade. Bringing this forward required careful review of extensive documentation, meaningful consultation with union representatives, close coordination with internal leadership, and structured communication to ensure fairness and transparency throughout the process. I established a clear framework, organized the required materials, facilitated constructive discussions across stakeholders, and sustained momentum until the matter was successfully resolved. Seeing this reach a fair and collaborative outcome was both professionally fulfilling and impactful for the team.

Alongside this, I contributed to proposal initiatives, including one that resulted in our team receiving the 2025 Outstanding Team Contribution Award. It was rewarding to see well-executed work recognized institutionally.

Beyond my formal roles, I have led large-scale cultural initiatives in partnership with municipal stakeholders, overseeing planning, budgets, volunteers, and risk to deliver inclusive and sustainable programs with accountability and impact. I look forward to contributing meaningfully at SFU.

Sincerely,
Fahmida Ahmed

PROFESSIONAL SUMMARY

PMP-certified Senior Business Analyst with 8+ years of experience driving digital transformation, process optimization, and data-driven decision-making across healthcare, finance, and technology sectors. Expert in requirements gathering, stakeholder management, business process modeling, and solution design. Proven track record translating business needs into technical requirements, leading cross-functional initiatives, and delivering solutions that improve operational efficiency. Strong background in data analysis, system implementation, change management, and ensuring regulatory compliance.

TECHNICAL SKILLS

Business Analysis: Requirements Gathering, Gap Analysis, Process Mapping, Use Case Development, User Stories, UAT
Methodologies: Agile/Scrum, Waterfall, PRINCE2, Six Sigma, Business Process Reengineering, Change Management
Tools & Software: JIRA, Confluence, MS Visio, Lucidchart, Tableau, Power BI, MS Office Suite, SQL
Data Analysis: SQL, Data Modeling, Dashboard Development, Reporting, KPI Tracking, Trend Analysis, Forecasting
Documentation: BRD, FRD, SRS, Process Flows, Wireframes, Technical Specifications, User Manuals, Training Materials
Domain Expertise: Healthcare IT, Financial Systems, CRM, ERP, Data Warehousing, Cloud Solutions (GCP, AWS)

PROFESSIONAL EXPERIENCE

Victoria Cool Aid Society January 2025 - Present
Senior Business Analyst - Data & Systems Victoria, BC, CA

- Lead business analysis for enterprise system implementations across health, financial, and housing domains, gathering requirements from stakeholders and translating business needs into technical specifications for development teams.
- Conduct gap analysis and process mapping to identify optimization opportunities, designing solutions that improved operational efficiency by 60% while ensuring PIPEDA and HIPAA compliance. Develop dashboards and KPI tracking systems enabling data-driven decision-making for executive leadership.

HiredAI Labs January 2024 - December 2024
Business Analyst - Technology Solutions Victoria, BC, CA

- Analyzed business requirements for AI/ML product integrations, creating user stories, acceptance criteria, and functional specifications for development teams implementing generative AI solutions.
- Facilitated stakeholder workshops and requirements sessions, improving solution delivery by 25% through clear documentation, process optimization, and change management support.
- Collaborated with product managers, engineers, and UX designers to ensure technical solutions aligned with business objectives, creating wireframes and conducting UAT for new features.

University of Victoria January 2022 - December 2023
Business Systems Analyst Victoria, BC, CA

- Analyzed business requirements for healthcare research systems handling sensitive EEG and medical data, documenting workflows, data flows, and compliance requirements for system implementations.
- Conducted feasibility studies and cost-benefit analyses for technology solutions including GPU computing platforms and AI research infrastructure, presenting recommendations to stakeholders and securing project approval.
- Developed process documentation, training materials, and standard operating procedures for speech processing systems and computer vision applications used by interdisciplinary research teams.

Netkom Technologies 2019 - 2021
Business Analyst - Research Operations Pakistan

- Gathered requirements and managed stakeholder relationships for research data collection projects, creating project plans, timelines, and resource allocation strategies.
- Documented business processes, developed data collection protocols, and created reporting frameworks ensuring data quality and research initiative success.

Huawei Technologies 2017 - 2018
Business Analyst - Network Operations Pakistan

- Analyzed network performance data and business requirements for telecommunications infrastructure projects, creating business cases and ROI analyses for network expansion initiatives.

EDUCATION

Master of Applied Science, Computer Engineering | University of Victoria, BC, Canada

CERTIFICATIONS & PUBLICATIONS

Certifications: PMI-PMP | Six Sigma Yellow Belt | Scrum Master | PRINCE2 Agile | GCP Professional ML Engineer

Publications: 5+ peer-reviewed papers in ML, AI, EEG analysis, emotion recognition, and wireless networks
